A meeting of the

Cabinet

will be held on Friday 9 February 2018 at 2.00 pm
Meeting Room 1, 135 Eastern Avenue, Milton Park, Milton, OX14 4SB

Cabinet Members:

Councillors

Matthew Barber (Chairman)
Roger Cox (Vice-Chairman)
Eric Batts
Ed Blagrove

Charlotte Dickson
Mike Murray
Robert Sharp
Elaine Ware

Alternative formats of this publication are available on request. These include large print, Braille, audio, email and easy read. For this or any other special requirements (such as access facilities) please contact the officer named on this agenda. Please give as much notice as possible before the meeting.

Margaret Reed
Head of Legal and Democratic Services

Council's vision

The council's vision is to take care of your interests across the Vale with enterprise, energy and efficiency.

Agenda

Open to the Public including the Press

1. Apologies for absence

To record apologies for absence.

2. Minutes

(Pages 5 - 7)

To adopt and sign as a correct record the minutes of the Cabinet meeting held on 8 December 2017.

3. Declarations of interest

To receive any declarations of disclosable pecuniary interests in respect of items on the agenda for this meeting.

4. Urgent business and chairman's announcements

To receive notification of any matters which the chairman determines should be considered as urgent business and the special circumstances which have made the matters urgent, and to receive any announcements from the chairman.

5. Public participation

To receive any questions or statements from members of the public that have registered to speak.

6. Petition - Abbey Meadows, Abingdon

(Wards Affected: Abingdon Abbey Northcourt)

At its meeting on 11 October 2017 Council received a petition regarding the public toilets at Abbey Meadows, Abingdon. The petition called for "excellent, accessible loos at Abbey Meadows". In accordance with the council's petition scheme, which provides for a full Council debate if a petition is signed by in excess of 500 people, the Council considered the petition at its meeting on 13 December 2017 and agreed to refer it to Cabinet for consideration. Cabinet is asked to respond to the petition.

7. Didcot Garden Town - heat mapping and master-planning

(Pages 8 - 13)

To consider the head of corporate services' report.

8. Housing and growth deal for Oxfordshire

Cabinet will discuss and recommend Council on whether to approve the Oxfordshire Housing and Growth Deal. If approved by the constituent authorities, delivery of the Deal will be overseen by the Oxfordshire Growth Board. The Growth Board is a statutory joint committee of the six Oxfordshire local authorities, the Local Enterprise Partnership and key strategic partners.

The Deal, as announced by Government in November 2017, provides £215 million of additional government funding for Oxfordshire, to deliver the key infrastructure required to underpin proposed housing development, and additional funds to increase the supply of affordable housing. This funding is comprised of £150 million for infrastructure, £60 million for affordable housing and £5 million capacity funding.

The additional funding will support Oxfordshire's ambition to plan for and support the delivery of up to 100,000 new homes across Oxfordshire between 2011 and 2031 to address the county's housing shortage and expected economic growth. This level of housing growth is that identified by the Oxfordshire Strategic Housing Market Assessment 2014, and is consistent with that planned for in existing and emerging Oxfordshire Local Plans.

The Deal also includes a proposed package of planning "freedoms and flexibilities" to help Oxfordshire to plan collectively for the long-term, sustainable development of the county by offering some protection from the risk of unplanned speculative development for the duration of development of a joint spatial plan and early years of its implementation.

If approved by all constituent authorities, confirmation, in writing, will go to the Secretary of State along with submission of the agreed Delivery Plan.

The Deal brings with it additional funds for Oxfordshire. It is proposed that Oxfordshire County Council acts as the Accountable Body for the deal and provides relevant reports to the Growth Board on a quarterly basis.

Following decisions from Government expected on 5 and 7 February, the Housing and Growth Deal Delivery Plan as well as a full report for the Cabinet meeting will be published.

Cabinet is being asked to recommend Council to approve the Oxfordshire Housing and Growth Delivery Plan together with associated detailed recommendations to be set out in the report.

9. Treasury management mid-year monitoring 2017/18

(Pages 14 - 25)

To consider the head of finance's report.

10. Treasury management strategy 2018/19

(Pages 26 - 51)

To consider the head of finance's report.

11. Revenue budget 2018/19 and capital programme to 2022/23

SEE SEPARATE PACK - APPENDIX E TO FOLLOW

To consider the head of finance's report.

12. Exclusion of the public, including the press

To consider whether to exclude members of the press and public from the meeting for the following item of business under Part 1 of Schedule 12A Section 100A(4) of the Local Government Act 1972 and as amended by the Local Government (Access to Information) (Variation) Order 2006 on the grounds that:

- (i) it involves the likely disclosure of exempt information as defined in paragraphs 1-7 Part 1 of Schedule 12A of the Act, and
- (ii) the public interest in maintaining the exemption outweighs the public interest in disclosing the information.

Exempt information under section 100A(4) of the Local Government Act 1972

The council hereby gives notice that it intends to hold part of this Cabinet meeting in private to consider the following items for the reasons set out in the 'exclusion of the public, including the press' item above.

13. Minutes

(Pages 52 - 54)

To adopt and sign as a correct record the exempt minutes of the Cabinet meeting held on 8 December 2017.

Minutes

of a meeting of the

Cabinet

held on Friday 8 December 2017 at 10.30 am

in the Meeting Room 1, 135 Eastern Avenue, Milton Park, Milton, OX14 4SB

Open to the public, including the press

Present:

Members: Councillors Matthew Barber (Chairman), Roger Cox (Vice-Chairman), Eric Batts, Charlotte Dickson, Robert Sharp and Elaine Ware

Officers: Steve Culliford, Andrew Down, William Jacobs, Margaret Reed and Mark Stone

Also present: Councillor Yvonne Constance and David Fairall (Capita HR)

Number of members of the public: None

Ca.42 Apologies for absence

Councillor Mike Murray had submitted an apology for absence.

Ca.43 Minutes

RESOLVED: to approve the minutes of the Cabinet meetings held on 22 September, 6 and 13 October 2017 as correct records and agree that the Chairman signs them as such.

Ca.44 Declarations of interest

None

Ca.45 Urgent business and chairman's announcements

None

Ca.46 Public participation

None

Ca.47 Housing delivery strategy 2018 to 2028

Cabinet considered the report of the head of development, regeneration and housing. This proposed the adoption of a joint housing delivery strategy with South Oxfordshire District Council, to cover the period 2018 to 2028. The focus of the strategy was for the council to take on the role of housing delivery enabler to assist in meeting housing targets.

Following a study of housing need and housing market trends, the strategy had been developed to housing developments could meet that need, developments could progress with minimal delay and were of good quality. The strategy would also help provide homes that were suitable for everyone, including enabling independent living, and provide homes that were affordable to those whose needs were not met by the market. The action plan would enable the council to be more in control over future housing developments in the district.

Cabinet welcomed the strategy.

RESOLVED: to adopt the Joint Housing Delivery Strategy 2018–2028.

Ca.48 Council tax base

Cabinet considered the head of finance's report regarding the setting of the council tax base for 2018/19. Before the council tax could be set by Council, a calculation had to be made of the council tax base: an estimate of the taxable resources for the whole district and for each parish.

Cabinet noted how the council tax base was calculated and noted the assumptions made as part of that calculation. Cabinet was asked to recommend the council tax base to Council. Once set by Council in December, the council tax base would be notified to Oxfordshire County Council, the Police and Crime Commissioner, and each parish and town council to allow them to set their budgets for 2018/19.

RECOMMENDED to Council:

- (a) That the report of the head of finance to Cabinet on 8 December 2017 for the calculation of the council's tax base and the calculation of the tax base for each parish area for 2018/19 be approved;
- (b) That, in accordance with The Local Authorities (Calculation of Council Tax Base) (England) Regulations 2012, the amount calculated by Vale of White Horse District Council as its council tax base for the year 2018/19 be 50,451.8; and
- (c) That, in accordance with The Local Authorities (Calculation of Council Tax Base) (England) Regulations 2012, the amount calculated by Vale of White Horse District Council as the council tax base for the year 2018/19 for each parish be the amount shown against the name of that parish in Appendix 1 of the report of the head of finance to Cabinet on 8 December 2017.

Ca.49 Exclusion of the public, including the press

RESOLVED: to exclude members of the press and public from the meeting for the following items of business under Part 1 of Schedule 12A Section 100A(4) of the Local Government Act 1972 and as amended by the Local Government (Access to Information) (Variation) Order 2006 on the grounds that:

- (i) it involves the likely disclosure of exempt information as defined in paragraphs 1-7 Part 1 of Schedule 12A of the Act, and
- (ii) the public interest in maintaining the exemption outweighs the public interest in disclosing the information.

Ca.50 Exempt minutes

Cabinet adopted the exempt minutes from its meeting held on 13 October 2017.

Ca.51 Corporate services contract

Cabinet agreed changes to the Five Councils' Partnership's corporate services contracts.

Ca.52 Management restructure

Cabinet agreed a new management structure.

To: CABINET on 9 February 2018 (Vale) and 12 February 2018 (South Oxfordshire)

Didcot Garden Town Heat Mapping and Masterplanning

Recommendations

- (a) Cabinet is requested to approve an application to Government for £60,000 match funding for a detailed feasibility study into the technical and commercial viability of a North Didcot district heat network using waste heat from Didcot power station.
- (b) Cabinet is requested to approve the allocation of £15,000 from South and £15,000 from Vale, from existing resources in the Didcot Garden Town and Energy budgets, to fund the councils' share of this work.
- (c) Subject to the above government grant funding being approved and received, Cabinet is requested to agree that the Lead Cabinet Member can approve, via an ICMD, to; i) implement the proposed project ii) delegate authority to the head of housing development and regeneration to finalise terms of, and enter into, a drawdown contract for the appointment of AECOM to deliver the feasibility study under the Places for People Placemaking Hub framework approved at the Cabinet meetings of 5 October and 6 October, as permitted under the framework.

Purpose of Report

1. This report presents the results of the Didcot Garden Town Heat Mapping and Masterplanning project and seeks agreement for the next steps. Specifically, the report seeks approval to spend £90,000 (£30,000 from existing council resources and £60,000 from government match funding when received) on a detailed feasibility study for a district heat network in 'North Didcot' using waste heat from the Didcot Power Station.

Corporate Objectives

2. South: This project supports the corporate objective to unlock the potential of Didcot - masterplan the wider town centre to develop a transformational change programme that meets garden town objectives.
3. Vale: This project supports the corporate decision to realise the Didcot Garden Town Vision.

Background

4. This report presents an overview of the Didcot Garden Town Heat Mapping and Masterplanning project, which took place from January to September 2017.
5. The final project report including full technical and commercial analysis is available [here](#) and includes an Executive Summary for a non-technical audience.

What is a district heat network?

6. A district heat network is a network of buried pipes connecting a cluster of buildings that require heat. The network is linked to an 'energy centre' which supplies heat from one central source. An energy centre can be powered by different fuels and a variety of technologies, ranging from traditional sources such as gas powered combined heat and power (gas CHP) to innovative or renewable sources such as waste heat, hydrogen, solar, ground source heat and biomass.
7. District heat networks can have the following benefits:
 - reduce emissions of greenhouse gases
 - reduce pollution and improve air quality
 - increase fuel security (resilience)
 - improve affordability of fuel supply (reduce fuel poverty)
 - contribute to a low carbon or zero emissions strategy
8. District heat networks can also contribute to local authorities' targets and aspirations for regeneration, inward investment, local jobs and growth. A local council's role in developing district heat networks can range from sponsor, planning authority and relationship broker to heat customer or heat source provider.

Government aims and funding

9. The government has set ambitious climate change targets for 2050:
 - heat from domestic properties will need to be almost entirely zero carbon
 - industrial properties will need to reduce emissions by 70%
10. The Future of Heating (UK Government, 2012) identified district heat networks as a key element of the UK's cost effective delivery of greenhouse gas targets.

11. The government's Heat Networks Delivery Unit (HNDU) provides guidance on district heat networks and allocates funding support for feasibility studies and business case preparation.
12. In addition, the Heat Networks Infrastructure Project (HNIP) has £320m funding for capital investment to bridge any gaps that may exist between project costs and a commercially viable level of investment.
13. HNDU project support involves five stages:
 - a. heat mapping - exploration, identification and prioritisation of heat network opportunities
 - b. energy masterplanning - high-level technical and financial modelling
 - c. feasibility study - technical feasibility, design, financial modelling and delivery approach
 - d. detailed project development - more detailed technical and financial feasibility, and outline business case; contractual arrangements
 - e. commercialisation, including some legal costs; tariff structuring; financial business case modelling

To date, we have completed stages 1 and 2 for the Didcot Garden Town area of influence.

14. Note that a district heat network can use a low carbon fuel from the start, however this is not essential. A network can be put in place now with a conventional fuel. The fuel source in the energy centre can be substituted in the future with a low carbon alternative when the first plant reaches the end of its life. This would be much easier and cheaper than retrofitting many individual buildings and is a key reason why the Government is providing funding for heat networks.

Overview of study method

15. The heat mapping stage of our project (HNDU Stage 1) included:
 - data collection of heat demands from existing buildings and proposed developments
 - creation of GIS heat maps
 - review of potential sites and technologies with councils and key stakeholders
 - selection of sites and clusters of buildings showing a concentration of heat demands to take forward for energy masterplanning
16. The energy masterplanning (HNDU Stage 2) included:
 - site visits and further energy data analysis
 - preliminary network design and energy centre locations
 - consideration of appropriate low / zero carbon technologies
 - high level techno-economic modelling
 - sensitivity analysis
 - additional site-specific information from review with councils and key stakeholders
 - review of risks and key issues
 - recommended schemes and next steps

Preferred schemes

17. The Heat Mapping and Masterplanning report recommends the following four schemes:

Priority	Name	Description	Key reasoning
1=	North Didcot	Energy centre on RWE (power station) site. Potentially serving Didcot A, Giant and D-Tech enterprise zones and non-residential buildings at NE Didcot. Potential to extend into Milton Park. Water source heat pump technology connected to power station waste heat circuits and River Thames	Innovative scheme of potentially national significance. Good greenhouse gas emissions savings and customer energy cost savings. Strong engagement from RWE. Some network demand risk although opportunities to mitigate this with potential additional connections
1=	South Gateway	Commercial and residential development adjacent to Didcot Railway station. Gas-engine CHP technology	Small relatively simple network. Potentially valuable pilot scheme for the councils. Relatively low risk. Strong stakeholder engagement. Will deliver sustainability objectives at prime Garden Town site.
3	Harwell	Rutherford Appleton Laboratory existing buildings at Harwell Campus. Water source heat pump technology gathering waste heat from cooling towers circuit plus a gas engine CHP system	Reasonably innovative scheme, low demand risk, reasonable greenhouse gas emission savings, some good stakeholder engagement. Potential requirement for gap funding.
4	Culham	Gas engine CHP technology serving existing Culham Science Centre buildings and non-residential new developments.	High indicative financial performance and customer energy cost savings, although higher network demand risk and stakeholder risk. Low innovation

18. Further details on these schemes including financial assessment, site opportunities and constraints, proposed heat network routes, key assumptions, key risks and sensitivity analysis can be found in the full Heat Mapping and Energy Masterplanning report. Other potential schemes are also described that, at present, are considered to have lower priority.

Options

19. There are three potential options for action for each of the four top priority heat networks:

1. do nothing
2. present findings to key stakeholders
rely on other parties to initiate and develop networks
councils can promote and advise
3. present findings to key stakeholders
councils take a lead, in partnership with others, in pursuing more detailed feasibility work (HNDU stage 3) including technical and commercial viability

20. The Councils propose to take the following actions with respect to the four priority projects:

Priority Project 1=: North Didcot: Option 3

This is an exciting opportunity for a strategic and nationally significant project using power station waste heat. Although there has been good stakeholder engagement, there are many disparate interests in this proposal which will require leadership. The councils propose to take the lead and commission a detailed feasibility study to take this project forward. A bid for match funding from HNDU round seven was made in December 2017. A stakeholder presentation took place in November 2017. Accordingly, this paper is recommending that South and Vale Councils agree to provide the £30,000 match funding on a 50:50 basis, so that an application for £60,000 can be submitted to HNDU.

Priority Project 1=: South Gateway: Option 2

The councils will lead on the development of the South Gateway project as part of the Didcot Garden Town Delivery Plan. A heat network with a centralised energy centre will be specified as the preferred heating option in the South Gateway development brief. This is a small project that will ultimately be funded by whichever developer is given the task of developing South Gateway site, and it is not thought that further government-funded feasibility studies are required.

Priority Projects 3 and 4: Harwell and Culham: Option 2

The councils has disseminated the results and recommendations through presentations to Harwell Campus and Culham Science Centre. Due to the public ownership of these sites, we recommend that feasibility studies and project development for these two projects be led by the land owners or their developers with the council taking on a more advisory or partner role.

Financial Implications

21. The detailed feasibility study for the 'North Didcot' proposed district heat network will cost an estimated £90,000. This sum includes allowances for complex technical modelling for this innovative proposal, extensive stakeholder engagement, and a project management resource to co-ordinate activities. The Project Board will include RWE npower and other external stakeholders.
22. A bid for match funding of £60,000 from HNDU was made in December 2017. The councils' contribution of £30,000 will be met from existing resources (Didcot Garden Town and Energy budgets).

Legal Implications

23. This project involves appointing a consultant to carry out detailed technical and commercial modelling. State Aid regulations are not believed to apply to this project as it does not involve the establishment of a heat network delivery vehicle, but legal advice will be sought on this once the detailed specification is available.
24. We expect to be procuring this work under an established framework agreement. A full procurement exercise is not likely to be necessary. Legal advice will be obtained in negotiating the draw down contract in order to protect the council's interests.

Risks

25. This project does not commit the council to any further action beyond the feasibility study proposed. A more detailed study may show that the project is not viable or stakeholder interest may not be sufficient. Neither of these outcomes are thought to present any reputation risk to the council as the act of investigating these forward looking and innovative energy options will in itself put the Councils in a positive light.
26. The risk of the contract costing more than the budget will be mitigated by reviewing the specification in conjunction with the suppliers if necessary.

Public relations implications

27. We have had regular meetings with stakeholder organisations throughout the project.

28. The project will be of interest to residents and an opportunity for the council to highlight our work on viable environmental solutions to the business sector and other partners. Some may believe that the money spent on studies and eventual implementation may outweigh the positive impacts. This can be counteracted by highlighting the economic and environmental benefits, and the fact that the final cost of the projects is expected to be met by partners and developers.

Conclusion

29. This report provides an update on progress to date with the Didcot Garden Town Heat Mapping and Masterplanning project. It invites councillors to approve the expenditure to carry out further feasibility work.

Joint Audit and Governance Committee

Report of Head of Finance

To: **Joint Audit and Governance Committee; Cabinet; Council**

DATE: 29 Jan 18 by Joint Audit and Governance Committee
9 Feb (V) / 12 Feb 18 (S) by Cabinet
14 Feb 18 (V) / 15 Feb 18 (S) by Council

Treasury management mid-year monitoring report 2017/18

Recommendations

That Joint Audit and Governance Committee:

- (a) notes the treasury management mid-year monitoring report 2017/18, and
- (b) is satisfied that the treasury activities are carried out in accordance with the treasury management strategy and policy.

That Cabinet:

considers any comments from Joint Audit and Governance Committee and recommends council to approve the report.

Purpose of report

1. The report fulfils the legislative requirements to ensure the adequate monitoring of the treasury management activities and that each council's prudential indicators are reported to their respective council mid-year (ie: as at 30 September). The report provides details of the treasury activities for the first six months of 2017/18 and an update on the current economic conditions with a view to the remainder of the year.

Strategic objectives

2. Managing the finances of the authority in accordance with the treasury management strategy will help to ensure that resources are available to deliver its services and meet the council's strategic objectives.

Background

3. The council's treasury activities are strictly regulated by legislation. The CIPFA Prudential Code and CIPFA Code of Practice for Treasury Management requires a monitoring report to be provided mid-year to council. The report covers the treasury activity for the period 1 April 2017 to 30 September 2017.
4. The 2017/18 treasury management strategy was approved by each council in February 2017. This report summarises the treasury activity and performance for the first six months of 2017/18 against those prudential indicators and benchmarks set for the year. It also provides an opportunity to review and subsequently revise limits if required. Full council is required to approve this report and any amendments to the Treasury Management Strategy.
5. Link Asset Services are the councils' retained treasury advisors. Capita Asset Services was sold by Capita to Link Group during the early part of the year and the business has been rebranded. There are no implications for the councils in terms of service provision.

Treasury activity

6. The mid-year performance of the two councils is summarised in the tables below¹.

	South	Treasury investments £000	Non treasury loan £000	Sub Total £000	Property investment £000	Overall total £000
1	Average investment balance	127,151	15,000	142,151	5,075	147,226
2	Budgeted investment income	789	311	1,100		
3	Actual investment income	1,350	312	1,662	218	1,880
4	surplus/(deficit) (3) - (2)	561	1	562		
5	Annualised rate of return	2.12%	4.16%	2.34%	8.59%	2.55%

	Vale	Treasury investments £000	Property investment £000	Overall total £000
1	Average investment balance	58,185	8,455	66,640
2	Budgeted investment income	190		
3	Actual investment income	279	287	566
4	surplus/(deficit) (3) - (2)	90		
5	Annualised rate of return	0.96%	6.79%	1.70%

¹ For property, the balance shown is the fair value of investment properties as at 31 March 2017.

7. The forecast outturn position as at September 2017, based on known investments and maturities and an estimate for future earnings is shown in the table below:

	South Oxfordshire District Council	Vale of White Horse District Council
Annual budget as per MTFP	£2,201,300	£379,160
Forecast outturn	£2,604,771	£393,280
Variance against budget	£403,471	£14,120
Borrowing	Nil	Nil

8. The Councils remain restricted regarding financial institutions meeting their investment criteria. When it is possible, investments will be placed with highly rated institutions for a longer duration with a view to increasing the weighted average maturity of the portfolio, but this has meant that overall there are less suitable counterparties available to the councils to deposit with.
9. **SODC.** The latest estimate is that income receivable on cash investments will be above budget by £403,471 by the end of the year. Cash balances have been higher than expected as a result of grant receipts relating to Didcot Garden Town and re-profiling of the capital programme due to delays in expenditure.
10. Officers monitor the performance of the unit trust holding on a regular basis. When the value reaches £14 million, a disposal of £2 million is made. During the first six months of 2017/18 the value of unit trusts has been just below the £14 million threshold and no disposals have been made.
11. **VWHDC.** The latest estimate is that income receivable on cash investments will be above budget by £14,120. This is due to higher than budgeted cash balances relating to grant funding from the EZ building foundations for growth that was received at the end of 2014/15 and has been invested pending disbursement, and the re-profiling of the capital programme as a result of delays in expenditure.
12. Following the TUPE transfer of accountancy staff to Capita in August 2016, a review of treasury management practice has commenced. The service is currently provided on a business as usual basis.

Performance measurement

13. A list of current investments as at 30 September is shown in Appendices A1 and A2. All investments were with approved counterparties. The average return on these investments is shown above in the table at paragraph 5. South has performed better than Vale because it holds more long term loans at higher rates and equities as a result of its larger investment base.
14. The councils' performance against benchmarks for the first six months of the year are detailed in Appendices A3 and A4. All benchmarks have been achieved except the CCLA benchmark which measures performance from the investment date rather than performance in the year. Performance for the year to date of 4.88% is higher than the short term benchmark of 4.58%.

Treasury management limits on activity

15. Each council is required by the Prudential Code to report on the limits set each year in their respective Treasury Management Strategies. The purpose of these limits is to

ensure that the activity of the treasury functions remain within certain parameters, thereby mitigating risk and reducing the impact of an adverse movement in interest rates. However, if these limits are set to be too restrictive they will impair the opportunities to reduce costs/improve performance. The limits for both councils are shown in appendices B1 and B2.

Debt activity during 2017/18

16. During the first six months of 2017/18 there has been no need for either of the councils to borrow. The s151 officer will continue to take a prudent approach to the councils' debt strategies. The prudential indicators and limits set out in appendices B1 and B2 provide the scope and flexibility for either of the councils to borrow in the short-term up to the maximum limits, if ever such a need arose within the cash flow management activities of the authority in order to achieve its service objectives.

Financial implications

17. Uncertainty following the referendum on EU membership in June 2016 remains. The depreciation of sterling has resulted in a rise in inflation (CPI) and this is predicted to remain above the two per cent target for some time. The Bank of England's Monetary Policy Committee increased interest rates by 0.25 per cent in November 2017 and has hinted that interest rates could rise further in 2018. Rates are not likely to reach pre-2008 levels for some considerable time (if at all).

Legal implications

18. There are no significant legal implications as a result of the recommendations in this report. Compliance with the CIPFA Code of Practice for Treasury Management in the Public Services and the CLG Local Government Investment Guidance provides assurance that the council's investments are, and will continue to be, within its legal powers.

Conclusion

19. This report provides details of the treasury management activities for the period 1 April 2017 to 30 September 2017 and the mid-year prudential indicators to each respective council.
20. Treasury activities at both councils have operated within the agreed parameters set out in their respective approved treasury management strategies.
21. This report also provides the monitoring information for joint audit and governance committee to fulfil its role of scrutinising treasury management activity at each council.

Prudential indicators – explanatory note

Debt

There are two limits on external debt: the 'Operational Boundary' and the 'Authorised Limit'. Both are consistent with the current commitments, existing plans and the proposals in the budget report for capital expenditure and financing, and with approved treasury management policy statement and practices. They are both based on estimates of most likely, but not worst case scenario.

The key difference is that the Authorised Limit cannot be breached without prior approval of the Council. It therefore includes more headroom to take account of eventualities such as delays in generating capital receipts, forward borrowing to take advantage of attractive interest rates, use of borrowing in place of operational leasing, "invest to save" projects, occasional short term borrowing to cover temporary revenue cash flow shortfalls as well as an assessment of risks involved in managing cash flows.

The Operational Boundary is a more realistic indicator of the likely position.

Interest rate exposures

The maximum proportion of interest on borrowing which is subject to fixed/variable rate of interest.

Investments

Interest rate exposure

The purpose of these indicators is to set ranges that will limit exposure to interest rate movement. The indicator required by the Treasury Management Code considers the net position of borrowing and investment and is based on principal sums outstanding.

Principal sums invested

This indicator sets a limit on the level of investments that can be made for more than 364 days.

Report to:

Joint Audit & Governance Committee Cabinet Council

Report of Head of Finance

To:	JOINT AUDIT & GOVERNANCE COMMITTEE on	29 January 2018
	CABINET on	9 February 2018
	COUNCIL on	14 February 2018

Treasury management and investment strategy 2018/19

Recommendations

The joint audit and governance committee recommends to cabinet and council:

1. To approve the treasury management strategy set out in appendix A to this report;
2. To approve the prudential indicators and treasury limits for the period 2018/19 to 2020/21 as set out in table 2, appendix A;
3. To approve the annual investment strategy set out in appendix A (paragraphs 18-59) and the lending criteria detailed in table 5.

That cabinet:

Considers any comments from committee and recommends council to approve the report.

Purpose of report

1. This report presents the council's Treasury Management Strategy (TMS) for 2018/19. This sets out how the council's treasury service will support capital investment decisions, and how the treasury management operates day to day. It sets out the limitations on treasury management activity governed by the prudential indicators, within which the council's treasury function must operate. The strategy is included as appendix A to the report. This report includes the three elements required by legislation as follows:
 - The **prudential indicators** required by the CIPFA Prudential Code for Capital Finance in Local Authorities;
 - The **annual investment strategy**. This sets out the council's criteria for selecting counterparties and limiting exposure to the risk of loss on its investments. This strategy is in accordance with the DCLG investment guidance and forms part of the treasury management strategy. (appendix A, paragraphs 18-59);
 - A statutory duty to approve a **minimum revenue provision** policy statement (Appendix A, paragraphs 51-55).

It is a requirement of the CIPFA Treasury Management Code 2011 that this report is approved by full Council on an annual basis.

Strategic objectives

2. Managing the finances of the authority in accordance with the treasury management strategy will help to ensure that resources are available to deliver its services and meet the council's strategic objectives.

Background

3. 'Treasury management' is the planning of the council's cash flows, its banking, money market and capital market transactions; the effective control of the risks associated with those activities; and the pursuit of optimum performance consistent with those risks.
4. The funding of the council's capital expenditure is also a function of treasury management. The capital programme provides a guide to the funding needs of the council and the long term cash flow plans to ensure that the council can meet its capital spending obligations.
5. Treasury investments are effectively what the council does with its cash resources before it is spent on the provision of services and the funding of the capital programme. All expenditure of a capital nature is managed through the council's capital programme and is not covered by this report. The council's property investment policy no longer forms part of this report.
6. The treasury management and annual investment strategy set out the council's policies for managing investments and confirms the council gives priority to the security and liquidity of those investments. It also includes the prudential indicators for the next three years; these demonstrate that the council's capital investment plans are affordable, prudent and sustainable.

7. The council's treasury management strategy 2018/19 is attached in appendix A. Whilst every attempt has been made to minimise the technical content of this report, it is, by its very nature and due to the need for compliance with associated guidance, technical in parts. A glossary of terms in appendix F should aid understanding of some of the technical terms used in the report.
8. CIPFA is currently conducting a review of the "Prudential Code" and the "Treasury Management Code of Practice". This review is particularly focused on 'non-treasury' investments, especially the purchase of investment property and other commercial activities that aim to generate income; but may require external borrowing (or the use of existing cash balances) to raise the cash to finance such activities.
9. The finalised codes are not expected until January 2018 and therefore the treasury management strategy set out in appendix A to this report, has been prepared in accordance with the current codes of practice.
10. To ensure the council's treasury management strategy is compliant with the new CIPFA Codes, a revised treasury management strategy will produced during 2018 if required. This will be subject to the same process of approvals as the current strategy.

Recommended changes to the treasury management strategy

11. Council approved the 2017/18 treasury management strategy on 15 February 2017. The proposed strategy for 2018/19 includes the changes detailed below, which cabinet is asked to recommend to council:

Counterparty limits

Over the last year, the council's treasury balances have exceeded the historical levels upon which the treasury limits were based. As a result temporary increases in treasury limits were required to be sought, through delegated powers to allow the council to continue to manage its treasury function effectively. This situation is expected to continue into the future and to ensure that the council's treasury limits now reflect the organisations needs the following changes are proposed:

- To raise the investment limit with building societies with assets over £1 billion to £4 million from £3 million.
- To raise the investment limit with building societies with assets over £3 billion to £5 million from £3.5 million.
- To raise the investment limit with building societies with assets over £5 billion to £7 million from £5 million.
- To raise the investment limit with institutions with a minimum F1 rating to £10 million from £7.5 million.

Investment type addition

Adding another investment type will allow the council wider choice of investment in the future as the pool of low risk counterparties reduces. There are no plans currently to invest in this vehicle.

- To add Non-UCITS Retail Schemes (NURS) to the strategy with a limit of £3 million.

Financial implications and risk assessment

12. This report and all associated policies and strategies set out clearly the parameters the council must work within. It is important that the council follows the approved treasury management strategy which is designed to help protect the council's finances by managing its risk exposure.
13. In the last few years investment income has fallen due to lower interest rates. In the medium term interest rates are expected to remain low. The Bank of England's Monetary Policy Committee increased interest rates by 0.25 per cent in November 2017 and has hinted that rates could rise further in 2018. Any rate rises are expected to be slow and gradual given the continued uncertainty in the economy
14. The table below gives an estimate of the investment income achievable for the next five years.

Table 1: Medium term investment income forecast					
	2018/19	2019/20	2020/21	2021/22	2022/23
	£000	£000	£000	£000	£000
Forecast as at December 2017	450	469	452	412	372

The 2018/19 budget setting report and medium term financial plan will take into account the latest projections of anticipated investment income.

Legal implications

15. There are no significant legal implications as a result of the recommendations in this report. Compliance with the CIPFA Code of Practice for Treasury Management in the Public Services, the CLG Local Government Investment Guidance provides assurance that the council's investments are, and will continue to be, within its legal powers.
16. The council must approve any amendment to the treasury management strategy and annual investment strategy in accordance with the Local Government Act 2003 (the Act), the CIPFA Code of Practice for Treasury Management in the Public Services and the CLG Local Government Investment Guidance under Section 15(1) (a) Local Government Act 2003 and CIPFA Prudential Code for Capital Finance.

Conclusion

17. This report provides details of the proposed changes to the treasury management strategy and the annual investment strategy for 2018/19 which are appended to this report, together with the prudential indicators for approval to council. These documents provide the parameters within which the council's treasury management function will operate.

Treasury Management Strategy 2018/19

Introduction

1. The Local Government Act 2003 and supporting regulations require the council to 'have regard to' the CIPFA Prudential Code and to set Prudential Indicators for the next three years to ensure that the council's capital investment plans are affordable, prudent and sustainable.
2. The Act requires the council to set out its treasury strategy for borrowing and to prepare an Annual Investment Strategy (as required by Investment Guidance issued subsequent to the Act). This sets out the council's policies for managing its investments and for giving priority to the security and liquidity of those investments.
3. The strategy in respect of the following aspects of the treasury management function is based on treasury officers' views on interest rates, supplemented with market forecasts provided by the council's treasury advisor, Link Asset Services. The strategy covers:
 - Prudential and treasury indicators in force that will limit the treasury risk and activities of the council;
 - Current treasury position
 - Prospects for interest rates;
 - Borrowing strategy
 - Policy on borrowing in advance of need;
 - Investment strategy;
 - Counterparty selection and limits;
 - Policy on use of external service providers;
 - Minimum revenue provision (MRP) statement;
 - Treasury management scheme of delegation and Section 151 role.
4. It is a statutory requirement under Section 32 of the Local Government Finance Act 1992, for the council to produce a balanced budget. In particular, Section 32 requires a local authority to calculate its budget requirement for each year to include the revenue costs that flow from capital financing decisions. This means that increases in capital expenditure must be limited to a level where any increases in charges to revenue are from:
 - Increases in interest charges caused by increased borrowing to finance additional capital expenditure, and
 - Any increases in running costs from new capital projects are identified and limited to a level which is affordable.

A key requirement of this report is to explain the risks, and the management of those risks, associated with providing the treasury service. Legislation requires that as a minimum two further treasury reports are provided: a mid-year monitoring report and an outturn report after the year-end that reports on actual activity for the year.

Treasury Limits for 2018/19 to 2020/21

5. It is a statutory duty, under Section 3 of the Act and supporting regulations for the council to determine and keep under review how much it can afford to borrow. The

Appendix A

amount so determined is called the “Affordable Borrowing Limit”. The Authorised Limit is the legislative limit specified in the Act.

6. The council must have regard to the Prudential Code when setting the Authorised Limit, which essentially requires it to ensure that total capital expenditure remains within sustainable limits and in particular, that the impact upon its future council tax is ‘acceptable’.
7. The Authorised Limit is set on a rolling basis, for the forthcoming financial year and two successive financial years.
8. The following indicators set the parameters within which we manage the overall capital investment and treasury management functions. There are specific treasury activity limits, which aim to contain the activity of the treasury function in order to manage risk and reduce the impact of an adverse movement in interest rates. However if these are set to be too restrictive they will impair the opportunities to reduce costs/improve performance. The limits are set out in table 2 below.

Cabinet is asked to recommend council to approve the limits:

Table 2: Prudential indicators				
	2017/18	2018/19	2019/20	2020/21
Debt	£m	£m	£m	£m
Authorised limit for external debt				
Borrowing	30	30	30	30
Other long term liabilities	5	5	5	5
	35	35	35	35
Operational boundary for external debt				
Borrowing	25	25	25	25
Other long term liabilities	5	5	5	5
	30	30	30	30
Interest rate exposures				
Maximum fixed rate borrowing	100%	100%	100%	100%
Maximum variable rate borrowing	100%	100%	100%	100%
Investments	£m	£m	£m	£m
Interest rate exposures				
Limits on fixed interest rates	100%	100%	100%	100%
Limits on variable interest rates	50	50	50	50
Principal sums invested > 364 days				
Upper limit for principal sums invested >364 days	40	40	40	40

Current position

9. The maturity structure of the council’s investments at 31 October 2017 was as follows:

Table 3: Maturity structure of investments:				
	Classification of investment at deal date		Classification as at 31/10/2017	
	£'000		£'000	
Call	0	0%	0	0%
Money market fund	5,840	10%	5,840	10%
Less than 6 months	3,000	5%	25,000	44%
6 months to 1 year	37,000	66%	17,000	30%
1 year + (loans to other local authorities)	8,000	14%	6,000	11%
CCLA - property fund	2,000	4%	2,541	5%
Total investments	55,840		56,381	

10. The council currently holds all of its investments in the form of either cash deposits or a managed property fund (£2 million with CCLA), the majority of which have been placed for fixed terms with a fixed investment return.

11. The council's considerations for investment will remain security, liquidity and yield – in that order. Within this framework an possible portfolio distribution of cash investments could be considered as follows:

This represents officer interpretations of a diversified portfolio and from time to time actual holdings will vary from this significantly.

Investment performance for the year to 31 October 2017.

12. The council’s budgeted investment return for 2017/18 is £0.471 million, and the actual interest received to date is shown as follows:

Table 4: Investment interest earned to date and outturn estimate				
Investment type	Interest Earned			
	Annual Budget	Actual to date	Annual Forecast	Forecast Variation
	2017/18	2017/18	2017/18	2017/18
	£000	£000	£000	£000
Position at end December 2017	379	400	564	185
Total interest	379	400	564	185

Borrowing Strategy 2018/19

13. The annual treasury management strategy has to set out details of the council's borrowing requirement, any maturing debt which will need to be re-financed, and the effect this will have on the treasury position over the next three years. This council currently has no external debt and in general, the council will borrow for one of two purposes:
- to support cash flow in the short-term;
 - To fund capital investment over the medium to long term.

Any borrowing undertaken will be within the scope of the boundaries given in the prudential indicators shown in Table 2, which allow for the council to borrow up to a maximum of £30 million, if such a need arose. This also allows short-term borrowing for the cash flow management activities of the authority.

14. The existing capital programme can be financed primarily from internal resources. either by use of reserves or internal borrowing or externally (through prudential borrowing). Any decision on borrowing will be taken by the Head of Finance based on the optimum cost to the council.
15. Any borrowing for capital financing purposes will be assessed by the Head of Finance to be prudent, sustainable and affordable
16. This strategy allows the Head of Finance to determine the most suitable repayment terms of any borrowing to demonstrate affordability and sustainability in the medium term financial plan if required. As a general rule, the term of any borrowing will not be longer than the expected life of the capital asset being created.

Policy on borrowing in advance of need

17. The council will not borrow more than or in advance of its needs, purely in order to profit from the investment of the extra sums borrowed. Any decision to borrow in advance will be within approved Capital Financing Requirement estimates, and will be considered carefully to ensure value for money can be demonstrated and that the council can ensure the security of such funds. In determining if any borrowing will be undertaken in advance of need, the council will:
- consider the impact of borrowing in advance on investment cash balances and the exposure to counterparty risk. Any risk associated with any borrowing in

Appendix A

advance of activity will be subject to prior appraisal and subsequent reporting through the mid-year or annual reporting process.

- consider the optimum point to borrow in advance of need to obtain the most beneficial rates on any loan raised to minimise the cost of borrowing over the duration of the loan.

Annual investment strategy

18. The primary aim of the council's investment strategy is to maintain the security and liquidity of its investments; yield or return on the investment will be a secondary consideration, subject to prudent security and liquidity. The council will ensure:
 - It has sufficient liquidity in its investments to cover cash flow. For this purpose it has set out parameters for determining the maximum periods for which funds may prudently be committed.
 - It maintains a policy covering the categories of investment types it will invest in, criteria for choosing investment counterparties with adequate security, and monitoring their security.
19. The strategy aims to provide a high degree of flexibility to take appropriate lending decisions, with a view to producing a portfolio with an even spread of maturity periods. This aim is to provide a more even and predictable investment return in the medium term.
20. The council's Head of Finance will ensure a counterparty list (a list of named institutions) is maintained in compliance with the recommended credit rating criteria (table 5) and will revise the criteria and submit any changes to the credit rating criteria to council for approval as necessary.

Investment types

21. The types of investment that the council can use are summarised below. These are split under the headings of 'specified' and 'non-specified' in accordance with the statutory guidance.

Specified investment instruments

22. These are sterling investments of not more than one year maturity, or those where the council has the right to be repaid within 12 months if it wishes. These would include sterling investments with:
 - UK government Debt Management Agency Deposit Facility (DMADF)
 - UK government – treasury stock (Gilts) with less than one year to maturity
 - Supranational bonds of less than one year's duration
 - Deposits with UK local authorities
 - Pooled investment vehicles such as Money Market Funds (MMF) (AAA rated)
 - Deposits with banks and building societies (minimum F1/A- rated)
 - Certificates of deposits issued by banks and building societies (minimum rating as above)

Non-specified investment instruments

23. These are any other type of investment (i.e. investments not defined as specified, above). Examples of non-specified investments include any sterling investments with:
- Supranational bonds of 1 to 10 years to maturity
 - UK treasury stock (Gilts) with a maturity of 1 to 10 years
 - Unrated building societies (minimum asset value £1 billion)
 - Bank and building society cash deposits up to 5 years (minimum F1/A- rated)
 - Deposits with UK local authorities up to 25 years to maturity
 - Corporate bonds
 - Pooled property, pooled bond funds and UK pooled equity funds
 - Non-UCITS Retail Schemes (NURS)

Other Non-specified investment instruments

24. Other non-specified investment instruments include:
- Fixed term deposits with variable rate and variable maturities

Approach to investing

25. The council holds approximately £14 million core cash balances which are available to invest for more than one year. This is expected to reduce over the medium term as the approved capital expenditure is incurred and not replenished by capital receipts. In addition the council has funds that are available on a temporary basis to invest. These are held pending payment over to another body such as precept payments and council tax. The amount can vary between £5 million and £15 million throughout the year and should only be invested short term (under one year). Investments will be made with reference to known cash flow requirements (liquidity).
26. While rates remain historically low the council will aim to keep investments relatively short term, but will continue to look for opportunities to fix lending in the medium term with highly rated institutions when possible for core cash balances. The aim is to increase the weighted average maturity of the portfolio in order to reduce maturity risk.
27. Officers will continue to implement an operational strategy which provides tight controls on the investments placed. Where possible, opportunities to spread the investment risk over different types of instruments will be considered.
28. Should market conditions deteriorate suddenly to the extent that the council is unable to place money with institutions with the necessary credit rating, it will make use of the UK Government deposit account (DMADF).
29. The council has the authority to lend to other local authorities at market rates. Current investments include £4 million of lending to Kingston upon Hull City Council, which matures in 2020/21. Whilst investments with other local authorities are considered to be supported by central government, officers will consider the financial viability and sustainability of the individual local authority before any funds are advanced.

Appendix A

30. Further investment in property funds will be looked at in more detail for consideration. In 2013/14 the council invested £2 million in the Churches Charities and Local Authorities pooled property investment fund (CCLA).
31. Money market funds are mainly used for liquidity; they also provide security and spread portfolio risk. Officers will always monitor the council's exposure to these funds in order to manage our security risk.
32. Currently the council does not make use of an external fund manager. Whilst there are presently no plans for this situation to change, this will continue to be kept under review.
33. Bond funds can be used to diversify the portfolio, whilst maintaining an element of liquidity and security. These will be considered and reviewed as an investment possibility to spread portfolio risk.
34. One option to offer diversification in the council's investment portfolio would be to make use of enhanced cash funds. Possible use of such funds would be intended for longer term investments than with traditional money market funds (i.e. for possible investment durations of three – six months). Investments placed with enhanced cash funds are callable and so offer the option to be withdrawn before maturity, although this is likely to have an adverse impact on the return on the investment.
35. Unlike money market funds, enhanced cash funds have a variable net asset value (VNAV). This means the assets are 'marked to market' (re-valued to current market value) on a daily basis and the fund unit price adjusted accordingly. Under this calculation basis the unit price fluctuates and could, therefore, be higher or lower than the original investment when it is redeemed. Any use of enhanced cash funds would be restricted to the high quality counterparty credit criteria as set out in Table 5 below.
36. The council does not currently make use of certificates of deposit. Consideration will be given to their use to assist diversification of the investment portfolio. Certificates of deposit have the same level of ranking and security as ordinary fixed term deposits but have the option of being traded before maturity. Certificates of deposit are bought and sold on the stock market and their price can go up or down prior to their redemption date. If held to maturity the investment will return their issue value. The council would only normally look to enter into such investments on a held to maturity basis.

Counterparty selection

37. Treasury management risk is the risk of loss of capital to the council. To minimise this risk, the council uses credit rating information when considering who to lend to. Link Asset Services provide the council with credit rating updates from all three ratings agencies – Standard & Poors, Fitch and Moodys.
38. The council will not use the approach suggested by CIPFA of using the lowest rating from all three rating agencies in evaluating investment opportunity. This is because adopting this approach could leave the council with too few counterparties for the strategy to be workable. Instead, counterparty investment limits will be set by reference to all of the assigned ratings.

Appendix A

39. Where counterparties fail to meet the minimum required criteria (Table 5 below) they will be omitted from the counterparty list. Any rating changes and rating watches (notification of a rating change) are provided to officers almost immediately after they occur and this information is considered before any deal is entered into. Extreme market movements may result in a downgrade of an institution or removal from the council's lending list.
40. Additional requirements under the CIPFA Treasury Management Code require the council to supplement the credit rating data with operational market information such as credit default swaps (CDS), negative watches and outlooks, which are considered when assessing the security of counterparties. This additional information is used so that the council does not rely solely on the current credit ratings of counterparties.
41. Where it is felt the council would benefit from utilising government guarantees provided by countries with an AAA rating, the council may lend to institutions covered by such guarantees. Any decision to lend in this way will be subject to consultation with the agreement of the cabinet member responsible for finance.

Country and sector considerations

42. The council has determined that it will only use approved counterparties outside the UK from countries with a minimum sovereign credit rating of AAA from Fitch Ratings.

Counterparty limits

43. In the normal course of the council's cash flow operations it is expected that both specified and non-specified investments will be used for the control of liquidity as both categories allow for short term investments. The use of longer term instruments (greater than one year from inception to repayment) will fall in the non-specified investment category. These instruments will be used where the council's liquidity requirements are safeguarded. The council will lend to institutions that meet the following criteria:

Appendix A

Table 5: Counterparty limits				
Counterparty	Minimum Fitch Rating (or equivalent)	Counterparty Limit	Max. maturity period	Maximum % of total investment
		£m		
Banks - house bank	n/a	£5.0m	3 months	20%
Bank - part nationalised UK	UK Sovereign	£15.0m	3 years	100%
Building societies - assets > £1,000m	n/a	£4.0m	12 months	50%
Building societies - assets > £3,000m	n/a	£5.0m	12 months	60%
Building societies - assets > £5,000m	n/a	£7.0m	12 months	70%
Institutions with a minimum rating	F1/A-	£10.0m	2 years	80%
Local Authorities / parish councils	n/a	£20.0m	25 years	20%
Money Market Fund (CNAV)	AAA	£20.0m	liquid	100%
Pooled property fund - CCLA	n/a	£3.0m	variable	10%
Corporate bonds	AA-	£5.0m	variable	40%
Enhanced cash funds (VNAV)	AAA/V1	£15.0m	variable	50%
Institutions with a minimum rating	F1+/AA-	£10.0m	5 years	100%
Institutions with a minimum rating	F2/BBB	£5.0m	1 year	70%
Non-UCITS Retail Scheme (NURS)	n/a	£3.0m	variable	10%
Managed bond fund	n/a	£5.0m	1 year	40%
Share capital/Equities	n/a	£3.0m	variable	20%
Supranationals	AAA	£10.0m	10 years	50%
UK government - gilts	UK Sovereign	no limit	25 years	20%
UK government - treasury bills	UK Sovereign	no limit	12 months	50%
UK Govt & DMADF	UK Sovereign	no limit	6 months	100%

44. The criteria for choosing counterparties provides a sound approach to investment. Whilst councillors are asked to approve the criteria in table 5, under exceptional market conditions the head of finance may temporarily restrict further investment activity to those counterparties considered of higher credit quality than the minimum criteria set out for approval.

Fund managers

45. The council does not currently employ any external fund managers. However in the event of such an appointment, appointees will comply with this and subsequent treasury strategies. This strategy empowers the Section 151 officer to appoint such an external manager to manage a proportion of the council's investment portfolio if this is advantageous. Situations in which this might be advantageous include benchmarking the performance of the treasury team; benefiting from the often extensive credit risk and economic modelling resources of external fund managers and resources necessary to hold liquid instruments for trading.

Risk and performance benchmarks

46. A requirement of the Code is that security and liquidity benchmarks are considered and approved. This is in addition to yield benchmarks which are used to assess performance. The benchmarks are guidelines (not limits) so may be breached depending on the movement in interest rates and counterparty criteria. Their purpose is to allow officers to monitor the current trend position and amend the operational strategy depending on any changes. Any breach of the benchmarks will be reported, with an explanation in the mid-year or annual report to audit and corporate governance committee. Detailed information for the assessment of risk is shown in appendix C.

Appendix A

47. Performance indicators are set to assess the adequacy of the treasury function over the year. These are distinct historic performance indicators, as opposed to the predominantly forward looking prudential indicators. The indicators used to assess the performance of the treasury function are:
- Cash investments - 3 month LIBID rate.
 - Property related investments – IPD Balance Property Unit Trust Index.
48. The results of these indicators will be reported in both the annual mid-year and year-end treasury reports.

Policy on the use of treasury management advisors

49. The council has a joint contract for treasury management advisors with South Oxfordshire District Council. Link Asset Services (was Capita Asset Services) provides a range of services which include:
- technical support on treasury matters, capital finance issues, statutory reports;
 - economic forecasts and interest rate analysis;
 - credit ratings / market information service involving the three main credit rating agencies;
 - strategic advice including a review of the investment and borrowing strategies and policy documents.
50. The council recognises that responsibility for treasury management decisions remains with the organisation at all times and will ensure that undue reliance is not placed upon our external service providers. It also recognises that there is value in employing external providers of treasury management services in order to acquire access to specialist skills, resources and up to date market information.

Minimum Revenue Provision (MRP) policy statement 2018/19

51. MRP is the amount out of revenues set aside each year as a provision for debt i.e. the provision in respect of capital expenditure financed by borrowing.
52. The council is required by regulation to approve an annual MRP policy before the start of the year to which it relates. Any in-year changes must also be submitted to the council for approval.
53. A variety of options are provided to councils for the calculation of MRP. The council has chosen the “asset life method” as being most appropriate. Using this method MRP will be based on the estimated life of the asset, in accordance with the regulations (this option must be applied for any expenditure capitalised under a Capitalisation Direction). Repayments included in annual PFI or finance leases are applied as MRP.
54. Currently, the council’s MRP liability is nil. This will remain the case unless capital expenditure is financed by external or internal borrowing.
55. The council’s current capital programme will primarily be financed from internal resources. If borrowing is undertaken then the council will be required by statute to set aside funds in the annual revenue budget to amortise the principal element of any borrowing – this is the MRP. There will also be a requirement to set aside revenue

Appendix A

budget for the interest payments on any borrowing raised. Loans will generally be taken over the life of the assets being financed and amortised accordingly. The Head of Finance will determine the most appropriate repayment method, term of borrowing and duration of borrowing. As a general illustration, Table 6 below gives an example of the annual revenue costs associated with borrowing an amount of £2.5 million over a 50 year period, based on the current district tax base of 50,452 Band D equivalents:

Loan amount	£2,500,000	
Loan duration	50 years	
PWLB interest rate	2.45 per cent	
2018/19 Taxbase	50,452	
	£	£ per band D
MRP element	50,000	0.99
Annual interest cost	61,250	1.21
Total	111,250	2.21

Councillor and officer training

56. The requirement for increased councillor consideration of treasury management matters and the need to ensure officers dealing with treasury management are trained and kept up to date requires a suitable training process for councillors and officers. In compliance with the current CIPFA Code, the council provided treasury management training to councillors in January 2017. Further training will be provided as soon as practical during 2018/19 as expected changes in the CIPFA code become available. Other training is available on request.

Treasury management scheme of delegation and the role of the Section 151 officer

57. The treasury management scheme of delegation and the role of the Section 151 officer is as follows:

I. Council

- Receiving and approval of reports on treasury management policies, practices, outturn and activities;
- Approval of annual strategy

II. Joint Audit and Governance Committee / Cabinet

- Approval of amendments to the organisations, adopted clauses, treasury management policy statements and treasury management practices;
- Receiving and reviewing monitoring reports and acting on recommendations;
- Ensuring effective scrutiny of the treasury management function

III. Section 151 Officer / Head of Finance

- Recommending clauses, treasury management policies/practices for approval, review and monitoring compliance;
- Submitting regular treasury management information reports;
- Submitting budgets and budget variations;
- Reviewing the performance of the treasury management function;
- Ensuring adequacy of treasury management resources and skills and the effective division of responsibilities within the treasury management function;

Appendix A

- Ensuring the adequacy of internal audit and liaising with external audit;
- Approving the selection of external service providers and agreeing terms of appointment.

Summary

58. Prior to the beginning of each financial year the council must approve the treasury management strategy. The strategy sets the parameters within which officers can manage the council's cash flows and invest any surplus funds.
59. This strategy provides a commentary on the current financial climate and sets out the council's lending strategy in response to this.

Economic conditions and interest rate forecasts

1. In order to put the investment strategy into context it is necessary to consider the strength of the UK economy, external factors in the financial markets and their impact on interest rate forecasts.

UK economy

2. Since the second quarter of 2013 the UK has reported rising levels of GDP. However, following the result of the EU referendum, growth has become volatile. Indicators suggest we will still see growth thanks to low unemployment and household spending, but the rate of growth will be slower than previously forecast.
3. Consumer Price Inflation is expected to peak very soon at 3.2 per cent. Forward indications are that rates of inflation will fall once the devaluation effect of sterling starts to fall out of the 12 month statistics.
4. Uncertainty over Brexit is weighing heavy on economic data. Little agreement over trade terms from 2019 is creating a lack of confidence with UK firms and is holding back investment.
5. Bank rate rose by 0.25 per cent in November 2017 to 0.50 per cent. Forward guidance from the Bank of England states that they expect rates to rise twice more in the next three years, to reach 1.00 per cent by 2020.

Eurozone economy

6. Growth has slowed during quarter three of 2017 in the Eurozone, however growth remains at an annualised rate of 3 per cent. Consumer confidence is rising, especially in Germany. The Euro has slipped in value against the dollar due to expectations that there will be an interest rate rise in the US. Rates in Europe are not expected to change.

Link Asset Services forward view

7. Economic forecasting continues to be difficult given the number of external influences affecting the UK. Key areas of risk include:
 - Geopolitical risks, especially North Korea, but also in Europe and the Middle East, which could lead to increasing safe haven flows;
 - UK economic growth and inflation;
 - Rising protectionism under President Trump;
 - A resurgence of the Eurozone sovereign debt crisis;
 - Weak capitalization of some European banks;
 - A sharp Chinese downturn and its impact on emerging market countries.
8. The view of Link Asset Services is that the overall balance of risks to economic recovery in the UK is currently to the downside. Risks to increases in bank rate are on the upside and depend on how strong growth turns out, how quickly inflation pressures rise and how quickly the Brexit negotiations move forward positively.

Prospects for interest rates

1. The bank base rate is forecast to remain unchanged at 0.50 per cent, rising in Q4 in 2018. Link Asset Service's central view for bank rate forecasts is shown below:

	Dec-17	Mar-18	Jun-18	Sep-18	Dec-18	Mar-19	Jun-19	Sep-19	Dec-19	Mar-20
Bank of England base rate	0.50	0.50	0.50	0.50	0.75	0.75	0.75	0.75	1.00	1.00
PWLB rates										
5 year borrowing	1.50	1.60	1.60	1.70	1.80	1.80	1.90	1.90	2.00	2.10
10 year borrowing	2.10	2.20	2.30	2.40	2.40	2.50	2.60	2.60	2.70	2.70
25 year borrowing	2.80	2.90	3.00	3.00	3.10	3.10	3.20	3.20	3.30	3.40
50 year borrowing	2.50	2.60	2.70	2.80	2.90	2.90	3.00	3.00	3.10	3.20

Benchmarking and Monitoring Security, Liquidity and Yield in the Investment Service.

1. These benchmarks are targets and so may be exceeded from time to time. Any variation will be reported, along with supporting reasons, in the Annual Treasury Report.
2. **Yield.** The local benchmark currently used to assess the performance of cash investments is the level of returns contrasted against the London Interbank Bid (LIBID) three month rate. This is the interest rate a bank would be willing to pay to borrow from another bank for three months.

Property related investments are benchmarked against the IPD Balanced Property Unit Trust Index.
3. **Liquidity.** Liquidity is defined as the council “having adequate, though not excessive, cash resources, borrowing arrangements, overdrafts or standby facilities to enable it at all times to have the level of funds available to it which are necessary for the achievement of its business/service objectives” (CIPFA Treasury Management Code of Practice).
4. In respect of this area, the council shall seek to:
 - maintain a minimal balance held in the council’s main bank account at the close of each working day. Transfers to the councils call accounts, MMF and investments will be arranged in order to achieve this, while maintaining access to adequate working capital at short notice.
 - use the authorised bank overdraft facility or short term borrowing where there is clear business case for doing so, to cover working capital requirements at short notice
5. **Security of the investments.** In the context of benchmarking, assessing security is very much more a subjective area to assess. Security is currently evidenced by the application of minimum credit quality criteria to investment counterparties, primarily through the use of credit ratings supplied by the three main credit rating agencies (Fitch, Moody’s and Standard and Poor’s). Whilst this approach embodies security considerations, benchmarking levels of risk is more problematic. One method to benchmark security risk is to assess the historic level of default against the minimum criteria used in the Council’s investment strategy. The table beneath shows average defaults for differing periods of investment grade products for each Fitch long term rating category over the last 20-30 years.

Average defaults for differing periods of investment

Long term rating	1 year	2 years	3 years	4 years	5 years
AA	0.01%	0.02%	0.08%	0.16%	0.23%
A	0.07%	0.19%	0.36%	0.55%	0.78%
BBB	0.15%	0.46%	0.82%	1.26%	1.73%

6. The council’s minimum long term (i.e. plus 365 day duration) rating criteria is currently “A-”. For comparison, the average expectation of default for a two year investment in a counterparty with an “A” long term rating would be 0.19 per cent of the total investment (e.g. for a £1m investment the average loss would be £1,900). **This is an average** - any specific counterparty loss is likely to be higher. These figures act as a proxy benchmark for risk across the portfolio.

Explanation of Prudential Indicators

Prudential borrowing permits local government organisations to borrow to fund capital spending plans provided they could demonstrate their affordability. Prudential indicators are the means to demonstrate affordability.

Authorised limit for external debt – this is the maximum limit for external borrowing. This is the statutory limit determined under section 3(1) of the Local Government Act 2003. This limit is set to allow sufficient headroom for day to day operational management of cash flows.

Operational boundary for external debt – this is set as the more likely amount that may be required for day to day cash flow.

Upper limit for fixed and variable interest rate exposure – these limits allow the council flexibility in its investment and borrowing options.

Upper limit for total principal sums invested for over 364 days – the amount it is considered can be prudently invested for periods in excess of a year.

Treasury Management Practice (TMP) 1 – credit and counterparty risk management

The CLG issued Investment Guidance in 2010, and this forms the structure of the council's policy below.

The key aim of the guidance is to maintain the current requirement for councils to invest prudently, and that priority is given to security and liquidity before yield. In order to facilitate this objective the guidance requires this council to have regard to the CIPFA publication Treasury Management in the Public Services: Code of Practice and Cross-Sectoral Guidance Notes. In accordance with the code, the head of finance has produced its treasury management practices (TMPs). This part, TMP1(1), covering investment counterparty policy requires approval each year.

The key requirements of both the Code and the guidance are to set an annual investment strategy, as part of its annual treasury strategy for the following year, covering the identification and approval of the following:

- the strategy guidelines for decision making on investments, particularly non-specified investments.
- the principles to be used to determine the maximum periods for which funds can be committed.
- specified investments the council will use. These are high security (i.e. have a high credit rating, although this is defined by the council, and no guidelines are given), and high liquidity investments in sterling and with a maturity of no more than a year.
- non-specified investments, clarifying the greater risk implications, identifying the general types of investment that may be used and a limit to the overall amount of various categories that can be held at any time.

The investment policy proposed for the council is:

Strategy guidelines – The main strategy guidelines are contained in the body of the treasury strategy statement.

Specified investments – These investments are sterling investments of not more than one year maturity, or those which could be for a longer period but where the council has the right to be repaid within 12 months if it wishes. These are considered low risk assets where the possibility of loss of principal or investment income is small. These would include sterling investments with:

- UK government Debt Management Agency Deposit Facility (DMADF)
- UK government – treasury stock (Gilts) with less than one year to maturity
- Supranational bonds of less than one year's duration
- Deposits with UK local authorities
- Pooled investment vehicles such as Money Market Funds (MMF) (AAA rated)
- Deposits with banks and building societies (minimum F1/A- rated)
- Certificates of deposits issued by banks and building societies (minimum rating as above)

Within these bodies, and in accordance with the Code, the council has set additional criteria to set the time and amount of monies which will be invested in these bodies. These criteria are as stated in Table 5 to this report.

Non-specified investments

These are any other type of investment (i.e. not defined or specified above). The identification and rationale supporting the selection of these other investments and the maximum limits to be applied are as set out in Table 5.

GLOSSARY OF TERMS

Authorised Limit	The maximum amount of external debt at any one time in the financial year.
Basis Point (BP)	1/100th of 1%, i.e. 0.01%
Base Rate	Minimum lending rate of a bank or financial institution in the UK.
Benchmark	A measure against which the investment policy or performance of a fund manager can be compared.
Bill of Exchange	A financial instrument financing trade.
Callable Deposit	A deposit placed with a bank or building society at a set rate for a set amount of time. However, the borrower has the right to repay the funds on pre agreed dates, before maturity. This decision is based on how market rates have moved since the deal was agreed. If rates have fallen the likelihood of the deposit being repaid rises, as cheaper money can be found by the borrower.
Cash Fund Management	Fund management is the management of an investment portfolio of cash on behalf of a private client or an institution, the receipts and distribution of dividends and interest, and all other administrative work in connection with the portfolio.
Certificate of Deposit (CD)	Evidence of a deposit with a specified bank or building society repayable on a fixed date. They are negotiable instruments and have a secondary market; therefore the holder of a CD is able to sell it to a third party before the maturity of the CD.
Commercial Paper	Short-term obligations with maturities ranging from 2 to 270 days issued by banks, corporations and other borrowers. Such instruments are unsecured and usually discounted, although some may be interest bearing.
Corporate Bond	Strictly speaking, corporate bonds are those issued by companies. However, the term is used to cover all bonds other than those issued by governments in their own currencies and includes issues by companies, supranational organisations and government agencies.
Counterparty	Another (or the other) party to an agreement or other market contract (e.g. lender/borrower/writer of a swap/etc.)
CDS	Credit Default Swap – a swap designed to transfer the credit exposure of fixed income products between parties. The buyer of a credit swap receives credit protection, whereas the seller of the swap guarantees the credit worthiness of the product. By doing this, the risk of default is transferred from the holder of the fixed income security to the seller of the swap.
CFR	Capital Financing Requirement.
CIPFA	Chartered Institute of Public Finance and Accountancy.
CLG	Department for Communities and Local Government.
Derivative	A contract whose value is based on the performance of an underlying financial asset, index or other investment, e.g. an option is a derivative because its value changes in relation to the performance of an underlying stock.
DMADF	Deposit Account offered by the Debt Management Office, guaranteed by the UK government.

Appendix F

ECB	European Central Bank – sets the central interest rates in the EMU area. The ECB determines the targets itself for its interest rate setting policy; this is the keep inflation within a band of 0 to 2 per cent. It does not accept that monetary policy is to be used to manage fluctuations in unemployment and growth caused by the business cycle.
Enhanced Cash Funds	A pooled investment fund. Longer dated investment than a MMF and, unlike a MMF, enhanced cash funds have variable asset value. Assets are marked to market on a daily basis and the unit prices vary accordingly. Investments can be withdrawn on a notice basis (the length of which depends on the fund) although such funds would typically be used for investments of 3 to 6 month duration.
Equity	A share in a company with limited liability. It generally enables the holder to share in the profitability of the company through dividend payments and capital gain.
Forward Deal	The act of agreeing today to deposit funds with an institution for an agreed time limit, on an agreed future date, at an agreed rate.
Forward Deposits	Same as forward dealing (above).
Fiscal Policy	The government policy on taxation and welfare payments.
GDP	Gross Domestic Product.
Gilt	Registered British government securities giving the investor an absolute commitment from the government to honour the debt that those securities represent.
Mark to Market Accounting	Accounting on the basis of the “fair value” of an asset or liability, based on the current market price. As a result, values will change with market conditions.
Minimum Revenue Provision	This is a prudent sum set aside each year to offset the principal repayment of any loan to smooth the impact on the local taxpayer.
Money Market Fund	A well rated, highly diversified pooled investment vehicle whose assets mainly comprise of short-term instruments. It is very similar to a unit trust, however a MMF relies on loans to companies rather than share holdings.
Monetary Policy Committee (MPC)	Government body that sets the bank rate (commonly referred to as being base rate). Their primary target is to keep inflation within plus or minus 1 per cent of a central target of 2.5 per cent in two years time from the date of the monthly meeting of the committee. Their secondary target is to support the government in maintaining high and stable levels of growth and employment.
Non-UCITS Retail Scheme (NURS) –	Undertakings for collective investments are funds authorised to be sold in the UK that are required to meet standards set by the UK services regulator. An example is property funds.
Operational Boundary	The most likely, prudent but not worst case scenario of external debt at any one time.
Other Bond Funds	Pooled funds investing in a wide range of bonds.
PWLB	Public Works Loan Board.
QE	Quantitative Easing.

Appendix F

Retail Price Index	Measurement of the monthly change in the average level of prices at the retail level weighted by the average expenditure pattern of the average person.
Sovereign Issues (Ex UK Gilts)	Bonds issued or guaranteed by nation states, but excluding UK government bonds.
Supranational Bonds	Bonds issued by supranational bodies, e.g. European Investment Bank. The bonds – also known as Multilateral Development Bank bonds – are generally AAA rated and behave similarly to gilts, but pay a higher yield (“spread”) given their relative illiquidity when compared with gilts.
Treasury Bill	Treasury bills are short-term debt instruments issued by the UK or other governments. They provide a return to the investor by virtue of being issued at a discount to their final redemption value.

Agenda Item 13

By virtue of paragraph(s) 1, 2, 3 of Part 1 of Schedule 12A
of the Local Government Act 1972.
