DATE: 15 February 2021

## Temporary changes to polling stations due to Covid 19

**Recommendation:** That the Committee

1. approves the temporary proposed changes to polling places set out in paragraph 5 of this report for the forthcoming elections to be held on 6 May 2021;
2. notes the temporary polling place changes agreed by the returning officer under delegated powers set out in paragraphs 6 and 7 of this report for the forthcoming elections to be held on 6 May 2021;
3. authorises the returning officer, in consultation with committee members and the ward councillors, to allocate appropriate polling places where the need arises for the elections on May 6 2021;
4. authorises the returning officer, in consultation with committee members and the ward councillors, to allocate appropriate polling places where the need arises for any other elections, by-elections, referendums and polls during 2021.

### Purpose of Report

1. This report sets out proposed changes to polling places for the May 2021 elections to provide a more Covid 19 secure environment, asks the committee to note those polling places designated by the returning officer under delegated powers as alternatives for those not available at these elections and seeks a delegation to make any further changes to polling places necessary to provide a secure voting environment for these and any other elections, by-elections, referendums and polls during 2021.

## Strategic Objectives

2. The report does not specifically relate to any of the council's strategic objectives, but agreement of the recommendations (amended if the committee sees fit) will ensure compliance with the law.

## Background

3. The Electoral Registration and Administration Act 2013 introduced a change to the timing of compulsory reviews of UK Parliamentary polling districts and polling places every four years. The last compulsory review was completed in October 2019. However, it is now necessary temporarily to review polling places which are not suitable in the current circumstances.

## Terminology

- **Polling District:** a geographical area created by the sub-division of a UK Parliamentary constituency or ward into smaller parts within which a polling place can be located which is convenient to electors. By and large each parish is a polling district in its own right and has its own polling place or places. Exceptions are where parishes are sub-divided into electoral wards or split between district wards which necessitates the creation of additional polling districts
- **Polling place:** the building(s) within each polling district that will house polling stations.
- **Polling stations:** the room or area within the polling place where voting takes place. The number of polling stations within each polling place is a matter for the returning officer and is not covered in this report.

## Proposed temporary changes

4. The temporary changes seek to address and comply with social distancing measures introduced by government. The venues set out below are considered wholly or partly unsuitable polling places for the May 2021 polls for the following reasons:
  - Social distancing difficult to maintain
  - Polling station staff unwilling to work if placed in a high risk environment
  - Failing electors expectations of feeling safe when voting
5. The table below sets out the current arrangements and proposed temporary changes.

Parish	Issue	Proposal
Faringdon	The Corn Exchange, Faringdon currently accommodates three polling stations. This is a very busy polling place and not suitable for three polling stations in the current circumstances.	To sub-divide the polling district to provide for a polling place and one polling station at The Corn Exchange with additional polling places with a single

		polling station at Faringdon Leisure Centre and Sudbury House Hotel.
Abingdon (Peachcroft)	North East Abingdon Community Association currently accommodates two polling stations.	Designate an additional polling place at Peachcroft Christian Centre to provide an additional venue. This venue is next door to the existing polling place at North East Abingdon Community Association
Radley	A polling place is currently provided for at the Site Office, Pebble Hill Mobile Home Park. This venue is very small and not considered suitable in the current circumstances.	To designate Radley Church Room as an alternative. Whilst the venue is not as convenient for electors it is more convenient than the alternative venue in Radley Village.

## **Temporary change to be agreed under delegated powers**

6. The Beacon in Wantage is currently designated as a polling place accommodating three polling stations (two for the Wantage and Grove Brook ward and one for Wantage Charlton). However, The Beacon will be unavailable for the elections. The scheme of delegation provides for the returning officer to designate an alternative polling place if the designated polling place becomes unavailable for a particular election. The returning officer has identified Wantage Baptist Church and Wantage Methodist Church for Wantage and Grove Brook and Wantage Town Football Club for Wantage Charlton as temporary alternatives.
7. The schedule approved by the committee in October 2019 designated Marcham Sports and Social Club as the polling place for Marcham. Due to the lack of availability of the venue the Baptist Church and Denman College have served as polling places at recent elections. The Sports and Social Club no longer exists having been demolished as part of a planning application for houses and community facilities including the Marcham Centre. The Marcham Centre offers excellent facilities for a polling place and as such the returning officer intends to designate it for use at the forthcoming elections.

## **Delegation to returning officer**

8. Officers within the elections team continue to review the safety of polling places for the forthcoming elections. In order to address any concerns with venues, the

committee is asked to authorise the returning officer to designate further alternative and additional polling places to address any safety concerns.

## **Publicising the changes**

9. In March, poll cards will be issued to eligible electors. These will highlight any temporary changes to polling stations.
10. Officers will work with colleagues in communications to advertise the changes via social media, press releases and parish councils. The location of polling stations will also be published on the website.

## **Financial Implications**

11. There are costs associated with running additional polling places and there will be additional costs associated with Covid secure measures.. For the forthcoming elections these will be split between Oxfordshire County Council, the Police and Crime Commissioner election and any by-elections or neighbourhood planning referendums because polling places will host multiple elections at the same time. Cost, however, should not be a prime consideration in determining the designation of a polling place, particular in the current circumstances.

## **Legal Implications**

12. The Representation of the People Act 1983 (as amended) (Section 18C (5) and Section 31) allows a local authority to conduct a review of any polling district, polling place or polling station within its area, outside of the timescales for a compulsory review.

## **Risks**

13. By designating alternative and additional venues we will be able to minimise the risk of spreading coronavirus to our staff and electors. Depending on the building one way systems will be operated through polling stations. Risk assessments of polling stations will be carried out and these, along with national and internal guidance, will determine Covid secure measures required.

## **Conclusion**

14. The council met its legal requirement to complete a review of polling districts and polling places in October 2019. To address concerns relating to the current pandemic, the committee is requested to agree alternative and additional polling places to provide a secure voting environment for electors and staff. The committee is also invited to note the changes agreed under delegated powers and to authorise the returning officer to make any further changes required to address safety concerns.
